Good Blood

Means good health, and Hood's Sarsaparilla has an unapproached record as a blood-purifier.

It effects its wonderful cures, not simply because it contains sarsaparilla but because it combines the utmost remedial values of more than 20 different ingredients. There is no real substitute for it. If urged to buy any preparation said to be "just as good" you may be sure it is inferior, costs less to make, and yields the dealer a larger profit.

Get Hood's Sarsaparilla today. In usual liquid form or in chocolated tablets known as Sarsatabs.

TORNADO ON PRAIRIE

Kansas, Missouri and Oklahoma 2,300 miles from St. Paul to Spokane Swept by Wind Storm.

FIVE DEAD AND FIFTY-FIVE HURT

Santa Fe Train Blown Into Ditch by Fierce Wind-Property Damage is Great.

Kansas City, May 15.—A series of tornadoes in Kansas, Missouri and Oklahoma late yesterday killed at least five persons, injured 55, laid waste one town, wrecked a train and did great damage to property.

Twenty-five persons were injured by a storm that swept over Mount Wash- the Union Pacific, giving the Harriman ington and Fairmont park, suburbs of Kansas City. At least two of these are thought to be fatally injured.

The town of Hollis, Kan., near Concordia, was swept away. Here three were killed and 10 injured.

Near Great Bend a tornado killed two and injured 20.

All wires are down in that vicinity, and it is feared the death list may be William Ackerly, a Santa Fe engi-

neer, and Frank Nicholson, a conductor, were killed while with a bridge gang between Great Bend and Kinsley. The tornado wrecked the work train of which Ackerly was engineer, and blew it into a ditch. Several members of the crew were blown 100 feet. The piledriver toppled over, crushing Ack-

erly to death in his can, where he remained with his hand upon the throttle. At Hoisington, Kan., a tornado in jured a number and greatly damaged farm property. It was not so severe, however, as that passing over other Government.

portions of the state. At Pond creek, Okla., a severe wind

unroofed several houses. A blinding rain and hailstorm accompanied the wind in all states. Many washouts demoralized railroad traffic.

The Missouri Pacific main line was washed out near Walcott, between Leavenworth and Kansas City. The Burlington and Santa Fe were forced to annul some of their trains Electrical disturbances crippled telegraph and telephone wires, and on this account only meager reports from the storm-swept area could be obtained.

A heavy wind, accompanied by rain and hail, prevailed throughout Kansas City. Much minor damage was done, and traffic of all kinds seriously inter-fered with.

OPEN INDIAN LANDS.

Over 2,000,000 Acres for Settle ment in Reservations.

Missoula, Mont., May 15.—Under a Washington date line, the Missoulian this morning prints the following:

At a conference held today by offi-cials of the general land office, the following tentative scheme was decided upon for the registration and opening of the Flathead reservation, in Montana, Coeur d'Alene in Idaho, and the Colville in Washington. The Flathead business prostration of 1895 and 1896 reservation contains about 1,200,000 has travel on American railroads been and the Colville about 400,000. All pamphlet issued by the bureau of rail-Registration points will only be estabpoints will be for all three of the reserbe Missoula, Kalispell, Coeur d'Alene and Spokane.

The registration period will probably for all three of the reservations at feverish rush of prosperity." Coeur d'Alene City. The drawing is an unimportant item in the general plan and will ocupy only one or two days. .

from Jipija, in the province of Manabi, announce that shocks have been experienced there since the first of the month, becoming more severe in the last few days. A dispatch from Quito says quakes were experienced there yesterday and that the local seismograph recorded on Wednesday strong shocks somewhere in the West Indies.

Record Price for Wool.

Miles City, Mont., May 15.—A sale

Japan Monday next. At the dinner which will be given to the officers of Miles City, Mont., May 15.—A sale of a large wool clip has been effected here for the highest price yet heard of this season, namely, 24 cents. The wool was the property of H. B. Wiley, cashier of the First National bank of this city, and went to a Boston house.

UNION PACIFIC EXEMPT.

Interstate Commerce Commission Allows Protest to Stand.

Washington, May 14.—Because it is over the Harriman railway system and only 1,900 miles over the Great Northern and Northern Pacific, the Interstate Commerce commission today modified its recent decision in the Spokane rate case, exempting the Harri-man roads from adoption of the rates fixed by that decision as to St. Paul traffic. This decision was made possible only by the fact that no direct line from St. Paul to Omaha was a party to the Spokane case.

The commission, however, is unwilling at this time to grant similar exemption to the Harriman system on freight from Chicago to Spokane, because the Northwestern and Burlington roads, which connect with the Union Pacific system at Omaha, were parties to that case. However, the commission temporarily postpones its order as to Chicago-Spokane rates over roads opportunity to establish new rates from Chicago to all territory between Pendleton and Spokane.

California Enters Protest.

San Francisco, May 14.—Believing that the reduction of freight rates to inland distributing points ordered recently by the Hill and Harriman lines, in accordance with the decision of the Interstate Commerce commission in the so-called Spokane case, will seri-ously injure Pacific coast cities to which no corresponding reduction has been made, William R. Wheeler, traffic manager of the Merchants' exchange, wired to the commissioners today asking for a stay in their approval of the proposed rates until the coast cities have had an opportunity to show the injustice of the new tariff.

WILL FIGHT STRIKE.

Paris, May 14.—A turbulent session storm slightly injured four persons and of the chamber of depuies today resulted in a victory for Premier Clemenceau, when the government's policy with regard to the postal strike was emphatically indorsed by a vote of 454 to 59, including also the government's insistence that the postal employes and other functionaries have no right to

> Immediately afterward the chamber passed a vote of general confidence in the government by 365 to 75.

> The strikers received the chamber's rebuke with a shrug of the shoulders, declaring it only served to bind closes their forces, which would soon startle the country by a big increase and a rapid extension of the general move-ment. On the other hand, it is intimated that the government has other plans in view.

> Up to midnight there was no change in the situation. If anything it was in the direction of a weakening of the strike sentiment. The general con-viction is that if the movement does not make vast strides tomorrow it is

FEWER RAILROAD ACCIDENTS

Year 1908 Was 40 Per Cent Safer Than Was 1907.

Chicago, May 14.-Not since the acres, the Coeur d'Alene about 400,000 so safe as it was during 1908. In a three reservations will be ready for way news and statistics, it is stated opening this summer, and all three of that there were 1,932 fewer fatalities them will be opened at the same time. to passengers and employes in railway accidents during 1908 than there were lished at towns where there is a United during 1907, which is a decrease of ap-States land office, and all registration proximately 40 per cert. The greatest decrease was in fatalities resulting vations. The registration points will from train accidents, and the following conclusion is drawn:

begin July 10 and end on August 15, in fatalities was due almost entirely to large quantities of them into the systhus giving five weeks' opportunity for the recession in freight traffic, which all persons to go to one of the places took the strain off every department of above designated to register. The quickness with which questions and answers came made the court gasp.

Mikado to Greet Americans

Tokio, May 14.—Rear Admiral Giles B. Harber and other officials will be received in audience by the emperor of Save the Babies.

NFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twentytwo per cent, or nearly one-quarter, die before they reach one year; thirtyseven per cent., or more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium, or morphine. They are, in considerable quantities, deadly poisons. In any quantity they stupefy, retard circulation and lead to congestions, sickness, death. Castoria operates exactly the reverse, but you must see that it bears the signature of Chas. H. Fletcher. Castoria causes the blood to circulate properly, opens the pores of the skin and allays fever.

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

in many cases and have always found it an efficient and speedy remedy." Dr. E. Down, of Philadelphia, Pa., says: "I have prescribed your Castoria in my practice for many years with great satisfaction to myself and benefit to my patients."

Dr. Edward Parrish, of Brooklyn, N. Y., says: "I have used your Castoria in my own household with good results, and have advised several patients to use it for its mild laxative effect and freedom from harm." Dr. J. B. Elliott, of New York City, says: "Having during the past six

years prescribed your Castoria for infantile stomach disorders, I most heartily commend its use. The formula contains nothing deleterious to the most delicate of children."

Dr. C. G. Sprague, of Omaha, Neb., says: "Your Castoria is an ideal medicine for children, and I frequently prescribe it. While I do not advocate the indiscriminate use of proprietary medicines, yet Castoria is an exception for conditions which arise in the care of children."

Dr. J. A. Parker, of Kansas City, Mo., says: "Your Castoria holds the esteem of the medical profession in a manner held by no other proprietary preparation. It is a sure and reliable medicine for infants and children. In fact, it is the universal household remedy for infantile ailments."

Dr. H. F. Merrill, of Augusta, Me., says: "Castoria is one of the very finest and most remarkable remedies for infants and children. In my opinion your Castoria has saved thousands from an early grave. I can furnish hundreds of testimonials from this locality as to its efficiency,

Dr. Norman M. Geer, of Cleveland, Ohio, says: "During the last twelve years I have frequently recommended your Castoria as one of the best preparations of the kind, being safe in the hands of parents and very effective in relieving children's disorders, while the ease with which such a pleasant preparation can be administered is a great advantage."

NOT NARCOTIC.

Water Supply in Many Cases Found Unnecessarily Polluted. E. F. Pernot, Oregon Agricultural College, Corvallia

The condition in which I find water received from various parts of the state warrants my calling the attention of which must exist surrounding their water supply. Some samples of water taken in storile bottles under asceptic precautions, contain as high as 63,580 germs per cubic centimeter (a teaspoon holds about five cubic centimeters of water and an ordinary drinking glass about 225 cubic centimeters). A glass ful of such water would therefore contain 14,305,500 living germs. While it is true that many varieties of these "All things considered, the conclusion is unavoidable that the diminution ing, the continued introduction of such tem lowers vitality and increases susceptibility to the disease producing types when they gain access to the body. Water containing so many organisms carries also, in solution, the ptomaines from the putrefaction of the organic matter in which they grew, These large number of organisms gen-erally find their way into open wells by surface drainage and where they can pass, so may the disease producing

types pass also.

The waters from driven wells are comparatively free from organisms. An open well is an abomination and is not in keeping with our present understanding of the laws of sanitation.

The question arises, how can we better our condition. Where a well is the be dug to the water bearing stratum, wall it up with brick laid in cement for ten feet, arch it over with the pump pipe and arch well cemented in. fill the remainder of the hole, which may be 15 to 20 feet, with clay well tramped down and the result will be a ground, into which no surface water, worms nor animals can penetrate. The water from such a well is as pure as can be obtained from the locality in which it is situated.

There are many families living in the country who should enjoy the best of health, but who are always ailing. The cause of ill health may, as a rule, be traced to their use of polluted water produced by the unsanitary condition of their surroundings. But few homes have proper drainage from sinks and baths, dish water is thrown out of the pack door on the ground near the well,

Egg-Phosphate RESCENT WILL DO ALL THAT ANY HIGH PRICED A FULL POUND 25c.

face water is contaminated, and, as the water level lowers, the open wells become reservoirs for the drainage.

an open well only serves the purpose their digestion, and passing from their of preventing the caving in of the bodies with the excreta the germs utilearth and in no sense acts as a filter. We have received samples of water Therefore a fly speck containing fifty from open wells, situated near barn-germs will increase its numbers fifty-

yards or dwellings, which were loaded fold. with organisms that are instrumental in decomposing manure. The samples gave strong reactions of ammonia by chemical analysis and were even tinted with the color of liquid manure. One This we have conclusively demonparticular sample was thus polluted from a flower bed near the house, the flower bed having been heavily massign saturated with cultures of the In localities where water is piped in-

to the house and there is no sewer, the toilets should be connected with a properly constructed septic tank and the effluent should be piped a long distance from the well and empty on the surface ter our condition. Where a well is the of the ground, where sun and air may only means of obtaining water, let it still further purify it. If an open closet must be used, a concrete vault, well cemented, should be constructed, instead of a mere hole in the ground, and lime frequently thrown into it to prevent the breeding of flies. Earth closets have been very successful and con-sist of galvanized iron trays or tubs bottomless brick jug, deep under that may be emptied away from the premises; dry earth or ashes should be used in connection with them to absorb moisture and suppress odor.

It is well known that flies breed in numan and animal manure; for example, the deposits of human excreta are often seen to be a crawling mass of maggots, these are the larvae hatched

cesspools. It is the lowest point in from the ergs deposited by flies, from its vicinity into which liquid's drain. this they pass into the pupa stage and Frequently a privy is located within a again emerge as flies with the return stone's throw of an open well. When of warm weather. These flies enter the water table rises to the surface of our wellings, walk upon our food and the ground, as it always does during directly transmit the organisms from the winter in Western Oregon, all surexcreta to our food. Contanimation does not cease at that, for we have definitely proven that the organisms which the flies take into their bodies The ordinary stone or brick wall of from the excreta are not destroyed by

If perchance the organism happens to be the typhoid bacillus, a fly speck upon an apple, or other food, will typhoid bacilli, then allowing them to excrete upon apples, cabbage leaves, other material that gives off moisture. The fly speck, after some time, assumes the form of a colony and is found to be loaded with living typhoid bacilli, showing that they had passed through the fly uninjured and had multiplied abundantly in the fly's deposit.

It is well known that milk is an ideal food for typhoid bacilli, and for that reason should be well guarded from the invasion of flies. Keep flies out of the house, especially that part where food is kept.
